Certified Org Topologies™ Practitioner, Level 1

Master the skills to design, asses and sustain agile ecosystems.

COTP-1

Audience

This two-day practical class is designed for executives, managers, consultants - all influencers excited and challenged about designing, assessing and sustaining agile ecosystems at the whole-company level to solve their existing problems by scaling agility beyond the team-level and frameworks.

Format

Taught by the creators of Org Topologies in an innovative format called "Org Design Studio" that allows participants to sketch, prototype, iterate, evaluate and improve different org design options with ease.

Body of Knowledge

This class is based upon the Org Topologies body of knowledge.

Org Topologies will enable you to own and master your path toward higher states of adaptability, starting from wherever you are now. Your organization will be more customer-focused, enabling you to stay relevant for your customers and stakeholders in the long run.

Trainers

This training is delivered by the creators of Org Topologies: Alexey Krivitsky (a Certified Scrum Trainer (CST) for scrumalliance.org), and Roland Flemm (a Professional Scrum Trainer (PST) for scrum.org). Both have been actively consulting in the field of business agility and large-scale product development for more than 15 years each.

Day One - "Assessing Agility":

- Seven archetypes of org design for product development
- Two key org design drivers that determine organizational maturity
- Six key paradigm shifts for transformation
- Assessing org design with Org Topologies Scans
- Assessing existing scaling frameworks with Org Topologies
- Understanding the qualities of high-level org archetypes

Day Two - "Designing for Agility"

- Four personal transformation journeys of CEO, Product Manager, Engineering Managers, Teams
- Discovering the product gap
- Designing high-level archetypes and practices to create and sustain them
- Sketching & improving org design options with Org Design Studio
- Participants discover options for improving org design of their organizations
